ORIENTALE
SICIS

L'ispirazione Sicis corre lungo la Via della Seta fino ai confini dell'alba. OrienTale è un mondo fantastico da attraversare e accarezzare, ha il fascino unico di un'esperienza quasi sinestetica. Sono forme e colori in mutevole quiete, morbidi al tatto, un kimono sfiorato dal soffio di una brezza estiva. In OrienTale la natura si perfeziona nel dettaglio di un istante, rivela l'ordine e l'equilibrio nel tratto deciso del vetro Murano animato con grazia dal fraseggio cromatico del vetro iridescente.

Mentre la natura prende forma sulla superificie, il fondo, con predominanza di toni scuri, dilata il tempo del racconto come quello dell'immaginazione, moltiplica gli spazi e le profondità grazie agli effetti riflettenti delle superfici specchiate Colibrì. OrienTale è un viaggio lontano a partire dal centro della propria stanza, verso mete remote come nel profondo dell'Io, ha il senso di un rinnovato incontro, converge verso un'attrazione istintiva per il dettaglio, nel centro in cui, oltre ogni dualità e con estrema grazia uomo e natura, quotidiano ed esotico, tecnica e arte si incontrano.

Una sfida ambiziosa, preziosa, lavorazioni estremamente accurate lambiscono i confini del micromosaico nei vasi creati in esclusiva per questa collezione. Si ispirano alle forme ed ai motivi dell'estremo oriente realizzati tra il XVIII e il XIX secolo, già a lungo ammirati e amati in Europa. Sono nuovi capolavori, per la prima volta bidimensionali, dell'arte del vaso espressa in mosaico.

Sicis inspiration runs along the Silk Road to the boundaries of dusk. OrienTale is a wonderful world to cross, featuring the unique fascination of an almost synaesthetic experience. Forms and colours in muted quiet, landscapes that envelop you like kimonos delicately brushed by the breath of a summer breeze.

In OrienTale, nature is perfected in the details of an instant, revealing order and balance in the decisive stroke of Murano glass animated gracefully by the chromatic phrasing of the iridescent glass.

Beyond the design, the base dominated by dark hues, dilates the time of the tale as that of imagination, multiplying spaces and depth thanks to reflective effects on the Colibrì mirrored surfaces. OrienTale is a long journey that starts at the centre of your room and heads towards far-off destinations like the depth of your inner self.

It is a renewed meeting, converging towards an instinctive attraction for details, at the heart of which, in addition to each duality and with absolute grace, man and nature, the daily and the exotic, technique and art, all meet.

The results are incredibly accurate, microscopic, precious combinations exalted in the vases created exclusively for this collection.

Inspired by the forms and designs developed in the 18th and 19th century Far East, and long admired and loved in Europe. These are the new masterpieces of vase art, two-dimensional for the very first time, and expressed as a mosaic.

L'inspiration SICIS voyage le long de la Route de la Soie jusqu'aux confins de l'aube.

OrienTale est un monde fantastique à traverser, il possède le charme unique d'une expérience quasi synesthétique. Ce sont des formes et des couleurs rythmées par une quiétude inconstante, des paysages enveloppant tels des kimonos effleurés par le souffle d'une brise estivale.

Dans OrienTale la nature se perfectionne dans le détail d'un instant, en révélant l'ordre et l'équilibre par le trait précis du verre de Murano, animé avec grâce par le tissage chromatique du verre iridescent.

Outre le dessin, le fond dominé par les tons foncés, dilate le temps du récit comme celui de l'imagination, multiplie les espaces et les profondeurs grâce aux effets réfléchissants des surfaces en miroir Colibrì.

OrienTale est un voyage lointain qui part du centre de la chambre de chacun, vers des destinations éloignées comme celles enfouies dans le moi profond, il a le sens d'une rencontre renouvelée, il converge vers une attraction instinctive pour le détail, au centre duquel, au-delà de toute dualité et avec une grâce extrême, homme et nature, quotidien et exotique, technique et art se rencontrent.

Il s'agit de créations incroyablement soignées, de combinaisons microscopiques et précieuses exaltées dans les vases réalisés en exclusivité pour cette collection. Ils s'inspirent des formes et des motifs conçus en Extrême Orient entre le XVIIIème et le XIXe siècle, aimés et admirés depuis longtemps en Europe.

Ce sont de nouveaux chefs d'œuvre, pour la première fois bidimensionnels, de l'art du vase exprimé en mosaïque.

Die Inspiration von SICIS folgt der Seidenstraße bis zu den Grenzen des Sonnenaufgangs. OrienTale ist eine phantastische Welt, die durchquert wird. Sie besitzt den einzigartigen Reiz eines beinahe synesthethischen Erlebnisses. Es handelt sich um Formen und Farben in wechselnder Stille, in wie Kimonos einhüllenden Landschaften, die vom Hauch einer sommerlichen Brise berührt werden. In OrienTale wird die Natur im Detail eines Augenblicks perfektioniert und enthüllt die Ordnung und das Gleichgewicht im entschlossenen Zug des Murano-Glases mit der Anmut des Farbenspiels im schillernden Glas. Neben der Gestaltung erweitert der Boden mit seinen überwiegend dunklen Tönen die Zeit des Erzählens und auch der Vorstellung, vervielfacht die Räume und Tiefen durch die reflektierenden Effekte der verspiegelten Oberflächen von Colibrì. OrienTale ist eine Reise in die Ferne, ausgehend von der Mitte des eigenen Raumes in Richtung weit entfernter Ziele, wie der Tiefe des Ichs. Sie hat den Sinn einer neuerlichen Begegnung und bewegt sich mit einer instinktiven Anziehungskraft für das Detail in die Mitte, in der jenseits jeglichen Dualismus und mit höchster Anmut, Mensch und Natur, Alltag und Exotik, Technik und Kunst aufeinander treffen. Diese unglaublich sorgfältigen Verarbeitungen als mikroskopische und edle Kombinationen werden in den exklusiv für diese Kollektion geschaffenen Gefäßen hervorgehoben. Sie erinnern an die Formen und Motive, die im Fernen Osten zwischen dem 18. und 19. Jahrhundert geschaffen und bereits seit langem in Europa bewundert und geliebt werden. Sie sind die neuen, erstmals zweidimensionalen Meisterwerke der Kunst der Gefäße, die in einem Mosaik zum Ausdruck kommt.
